EDUCATION

University of Leeds, Leeds, UK	2025.09 - Present
PhD Computer Science (EPSRC Doctoral Landscape Award Studentship)	
Supervisor: Rafael Kuffner dos Anjos, Gordon D. Love	
Cornell Tech (Cornell University), New York, USA	2024.08 - 2025.05
MEng Computer Science GPA: 4.0/4.3	
University of Nottingham, Ningbo, CN; Nottingham, UK	2020.09 - 2024.07
BSc Hons Computer Science GPA: 3.99/4.0	

PUBLICATIONS

Rethinking Color Precision: Real-Time Perceptual Spatial Quantization for Foveated Rendering	2026
Zhening Zhu, Gordon D. Love, Rafael Kuffner dos Anjos	
Eurographics Symposium on Rendering (EGSR)	

RESEARCH EXPERIENCE

MRTodo: Synchronizing Paper and Digital To-Do Lists in Mixed Reality	2025.04 - 2025.09
VVAI Lab, Texas A&M	
- Designed and developed a context-aware productivity application within hybrid paper-digital interface. - Executed user study, including both qualitative interviews and quantitative analysis.	
Real-time Localization & 3D Scene Visualization	2024.07 - 2024.08
Advanced Display and Sensing Research Center, Yongjiang Laboratory	
Developed a web-based interactive tool to visualize real-time SLAM localization of camera pose and 3D scene reconstruction results.	
Transmogrifier: Visuomotor misalignment for Non-humanoid Avatars	2023.10 - 2024.05
Mixed Reality Lab, University of Nottingham	
- Designed physics-based locomotion for non-humanoid avatars and movements of extra body parts through inverse kinematics and procedural animation. - Designed visuomotor misalignment to simulate varied body weights and forces. - Simulated vision features including color perception, echolocation, blurring vision. - Conducted user study and semi-structured interviews, gathered qualitative data exploring body ownership.	
Fire Safety Training Through Virtual Reality Serious Gaming	2022.06 - 2022.10
China Beacon Institute, University of Nottingham Ningbo China	
- Designed and developed fire extinguishing equipment training in non-immersive and immersive settings. - Designed experiment workflow for analyzing the effectiveness of different simulation in terms of learning outcomes and user engagement and evaluating interaction preference of users.	

HONORS AND AWARDS

Product Studio Finalist at Innovation Meets Impact	2025
University of Nottingham Ningbo China Outstanding Graduate	2024
Undergraduate Best Overall Performance Award	2024
Academic Excellence Scholarship (Provost's Scholarship)	2021, 2022
Zhejiang Provincial Scholarship	2021

SKILLS

Languages: C#, C++ (OpenGL, Vulkan), Python, JavaScript
Tools: Unity, Unreal Engine, Figma, Adobe Photoshop, Blender
